SUMMARY

React Native & TypeScript engineer with **5+ years** building and shipping **consumer-facing** cross-platform apps to the App Store and Google Play. Experienced in **reusable, configuration-driven component and design systems** that let teams iterate on features fast, and in turning product and business requirements into polished, shipped UI alongside designers and product owners. Comfortable with payments and real-time flows (Stripe, encrypted messaging), performance at scale, and design-to-code (Figma → accessible UI following **Material 3** and **Apple Human Interface Guidelines**), backed by CI/CD, TDD/BDD, A/B testing, and Agile.

EXPERIENCE

Stackfinity — Senior Frontend Software Engineer

Remote · Oct 2024 – Present

- Built and shipped cross-platform mobile apps in **React Native** and Flutter across language-learning, healthcare, and transport — releasing to the Apple App Store and Google Play.
- Partnered with designers and product owners to translate requirements and Figma/Adobe XD handoffs into pixel-accurate, accessible UI (**Material 3**, **Apple Human Interface Guidelines**), building reusable, configuration-driven component and design systems for rapid feature iteration.
- Integrated RESTful APIs and PostgreSQL backends; implemented secure flows — Stripe payments, OTP verification, and encrypted real-time messaging.
- Drove performance optimizations (lazy loading, Redux/Provider state) and used analytics to resolve UX pain points, improving engagement.

Devsinc — Software Engineer

Lahore, PK · Nov 2022 – Sep 2024

- Built scalable web & mobile apps in React Native, React, and Node.js — **+40% performance, +30% engagement**.
- Delivered state-managed, testable UI (Redux, Zustand) and SSR/SEO for web; integrated .NET APIs in Agile teams at 95% on-time delivery.
- Set up Dockerized environments and Jenkins CI/CD; worked from Figma handoffs to brand and accessibility standards.
- Shipped React Native features for **BeautyPass**, a high-profile fashion/influencer lifestyle app.

ACE Internationals — Frontend Developer & QA

Lahore, PK · Nov 2021 – Nov 2022

- Built and tested responsive React apps; authored Cypress E2E/regression suites, cutting manual QA ~50% and QA overhead ~40%.
- Ran usability testing and performance audits, improving UI responsiveness by up to 60%.

Stackfinity — Software Engineer

Lahore, PK · Oct 2020 – Sep 2021

- Built mobile-first React Native and Flutter apps with offline-first architecture — **+35% UX, -50% bundle size**.
- Integrated REST & GraphQL with optimized state (Redux, React Query, Provider), reducing latency ~20%.

SKILLS

Mobile: React Native, Flutter, Expo, React Navigation, Provider, offline-first, push notifications
Frontend: React (Advanced), Next.js, TypeScript, JavaScript, Redux & Redux Toolkit, React Query, Formik, reusable & configuration-driven UI systems
Design-to-code: Material UI, Material 3, Apple HIG, Figma, Adobe XD, HTML/SCSS/CSS, accessibility, responsive design
Backend & Data: Node.js, Express, NestJS, REST & GraphQL, PostgreSQL, MongoDB, MySQL, SQLite
Testing & DevOps: Cypress, unit & E2E testing, TDD/BDD, A/B testing, Git/GitHub, Docker, Jenkins CI/CD, AWS, Azure DevOps

PUBLISHED APPS

- Noor · Soul Tracker — spiritual wellness tracker (iOS & Android)
 - Sentential — language learning (Flutter)
 - Khata at Home — ledger / expense tracker (Flutter)
- Snap Cards Match — memory game (Watch/iPhone/iPad/Mac)
 - Rosterify — staff shift scheduling (Flutter)
 - TwoDos — collaborative to-dos (Flutter, Mac)

Also: BeautyPass & Mastery/MasterMind (React Native) · XiltriX SaaS (React) · IshowroomPro (Vue/Ionic).

EDUCATION

B.Sc. Computer Science — FAST National University of Computer & Emerging Sciences

2018 – 2022 · EQF 6
